SAY SO LONG TO SURFACE DEBRIS

With a large front paddle wheel, Skimbot® effectively removes surface debris by pushing it into a large-capacity debris tray that is easily emptied.

COMPLETE POOL SURFACE COVERAGE

Engineered with multi-directional navigation, Skimbot propels itself across the surface of your pool guided by sensors that allow it to avoid running into walls and other obstacles.

POWERED BY THE SUN

No cords, hoses or electrical outlets required. Skimbot uses solar power to charge itself as it runs in the daytime and saves surplus power to continue running after dark.

SINGLE-BUTTON OPERATION

Simply press the power button and place Skimbot into your pool to remove surface debris while simultaneously charging itself in the sun.
